Introduction

iCop's Desktop Directory is published for one reason only: to help you avoid the online hype-masters and scam artists. It leads you, instead, straight to the most reputable and ethical online companies to do business with.

It took *years* to convince people it was safe to shop and spend money online. Recently, some of the "**gurus**" and so-called "**leaders**" of Internet marketing **have begun buying and selling customer information** – personal information including telephone numbers!

In many cases this is being done without giving the customer the chance to say, "No" – or "opt-out" - of having their information exchanged. Although it may be legal to sell customer information, we believe ***it is disrespectful to you, the customer, and a violation to your right to privacy!***

iCop™ stands firmly against any transfer of personal information for reasons of building the contact lists of third parties. Any iCop™ member who participates in the sale of the personal information of visitors or customers, to build the contact lists of third parties, is removed from membership immediately, and without recourse.

You will find the iCop™ Membership Seal proudly displayed on web sites around the world by professionals who adhere to the highest standards of business ethics as espoused by our association. **When you do business with an iCop™ member, you are assured of dealing with a company of the highest integrity.**

At the web sites of iCop™ members, you will *always* find:

- Companies that adhere to the guidelines of the U.S. Federal Trade Commission (FTC) – even if they are based outside the USA
- Companies that stand behind their products - with fair refund policies
- Complete physical contact information
- Secure servers for online payments
- NO hidden charges, overblown hype or false advertising
- NO unsolicited commercial email
- Companies that pledge NEVER to sell, trade, or give away your personal information

So, **before you buy *anything* online**, check this handy Desktop Directory of iCop™ members to see if you can find the same item from a company you can trust! By doing so, you'll be able to shop without fear.

Share the iCop™ Desktop Directory with Others!

Feel free to share this handy and valuable Desktop Directory with your friends, colleagues, subscribers or whomever you choose.

**** CAUTION ****

As you visit any web site listed in the Desktop Directory, please **be sure the first thing you do is to look for an iCop™ Seal!**

Occasionally, we *do* have to show a member the door. **If the seal isn't displayed**, you should be aware that this business is **no longer approved** to carry the iCop™ seal.

Using the Desktop Directory

This Desktop Directory is dynamic and will **always be up-to-date**. Each time a change is made to iCop's™ Business Directory, it is immediately reflected in your personal copy of this Desktop version. You will never need to download an updated copy!

Just keep this .pdf file on your desktop. When you need something online, open it to page 4 and click on the category you wish to review. You will be taken to the corresponding page on the iCop™ web site. (Be sure your internet browser is open when using this directory.)

Better Vision for Children Foundation

Did You Know ...

- 1) Amblyopia, in its several types, is now the leading cause of permanent vision loss in the United States.
- 2) Retinoblastoma is now one of the leading causes of infant death. In many cases the eye(s) are removed to prevent the spread of cancer and the child still dies.
- 3) Amblyopia and retinoblastoma incapacitate or blind about 500,000 children each year and have already done the same to over 18 million adults.
- 4) Amblyopia is usually not reversible after age five, resulting in legal blindness at 20/200 or worse.
- 5) Amblyopia and retinoblastoma was detected in over 30 percent of the children screened in three years (results of tests conducted by B.V.C. at preschools and Wal-Mart Vision Centers in low-income areas of San Diego County beginning in October 1995).
- 6) Amblyopia and retinoblastoma do not "go away" on their own. It must be treated.
- 7) Amblyopia and retinoblastoma are easily prevented or treated in most cases, if detected before age three.
- 8) Amblyopia has been virtually eliminated in Sweden!
- 9) Amblyopia and retinoblastoma can be reliably detected only by pediatric ophthalmologists in lengthy testing which is not usually done (barring injury, how many times did your child visit a pediatric ophthalmologist before the age of five?), or with this portable, instantaneous, photo-refractive screening done exclusively by the Better Vision for Children Foundation's Project H.E.A.L. (Help Eliminate Amblyopia/Lazy eye).
